To Whom It May Concern:

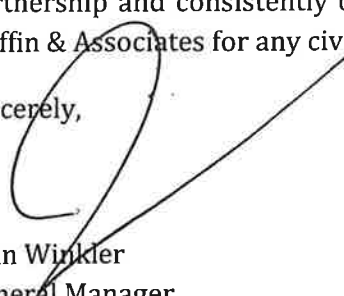

I am pleased to provide this letter of recommendation on behalf of Ehrhart Griffin & Associates (EGA), and specifically Dan Dolezal and his exceptional team. EGA exemplifies consistent excellence, deep technical expertise, and unmatched commitment to client success.

Our organization has partnered with EGA on many projects throughout the Omaha metropolitan area. Across every engagement, EGA has brought forward high-quality design solutions, informed by their extensive project experience. Their established and productive working relationships with multiple agencies have routinely helped us anticipate, navigate, and overcome potential roadblocks with efficiency and professionalism.

Mr. Dolezal and his team are consistently knowledgeable, responsive, and solutions-oriented. Their technical insight into civil engineering, entitlement, and planning processes has been instrumental in improving feasibility, strengthening project outcomes, and ensuring smooth progression through the approval pipeline. They approach every project with a positive, collaborative attitude that makes complex workstreams not only manageable, but enjoyable.

EGA's ability to combine technical expertise with practical creativity, strong communication, and a client-first mindset has been a critical factor in the success of many of our projects. Based on years of successful partnership and consistently outstanding performance, I can confidently and highly recommend Ehrhart Griffin & Associates for any civil engineering or development project.

Sincerely,

John Winkler
